

Europa 24, Kitana Shimada, Niko Breyer 21 die 2019 - 6 min read Two men and a car filmed in a variety of locations in Berlin and Miami Category:Google MapsQuantitative ultrasound of bone: measurement and interpretation. Quantitative ultrasound (QUS) is a method for noninvasive measurement of bone strength and quality in vivo. It combines the properties of ultrasound transmission with the assessment of the mechanical response to the applied stimulus. High frequency sound waves are reflected from the surfaces of bone and soft tissue and the amplitude of the reflection is used to determine the ultrasonic velocity, which is proportional to the stiffness and density of the scanned tissue. The difference in ultrasonic velocity between the bone and the soft tissue is used as an indicator of the degree of mineralization and the amount of collagen in the bone. The frequency (20-60 kHz) used to acquire the data has a direct effect on the magnitude of the velocity difference. Ultrasound propagation through the bone is also affected by the structure of the bone itself. These effects influence the interpretation of the clinical data and mean that the interpretation of QUS data depends on an understanding of the underlying physical principles and models. This article reviews the physical basis of QUS and the equations used to interpret the data.Documentary television series The Last Leg, which follows two disabled people on a journey around the world, will be bringing its third series to Dublin next year. The show, which was set up by two men with disabilities, will be filmed in the Irish capital in June. The series has previously been made in Bristol and London and will be followed by a trip around Europe. Co-creators Ben Dunn and Andy Dandy have taken several trips around the world together. Last Leg won Best International Sitcom at the 2012 British Academy Television Awards and has also won the International Emmy for Best International Television Sitcom. In a statement, Dandy said: "I was in the UK earlier this year and saw the hard work and commitment to creating Last Leg, as well as the amazing things disabled people do every day, and the world of disabled tourism, has become more and more accessible. "I think we are only just starting to scratch the surface of the great opportunities disabled people face around the world and am so delighted to be bringing the show to Dublin for the first time." The announcement was made on Radio 1's Zoe Ball show. The first two series of The
