- All About Compu... I was
wondering if there is a
similar solution for Windows
98 to boot from a USB flash
drive (using W98SE or
W98SE2)? A: I don't have a
Windows 98 ISO to test, but
here is the situation with the

Windows 2000 ISO. I have a bootable disk that boots Windows 2000 Ultimate from a USB 2.0 thumb drive. Here are the steps I followed: Download and install the Thumb Boot utility from: This tool needs to be run from within Windows (it will not run from a DOS

prompt). If you are using Windows 98, you will need to use the USB Thumb Creator program to burn the ISO to the USB flash drive. While inside the Thumb Boot utility, use the USB thumb drive to boot the Windows 2000 ISO (of course, make sure you have

the right ISO for your computer!). Then, once you are done, eject the thumb drive. You may need to do this with 2 different USB thumb drives if Windows 98 is not seeing the thumb drive. Now, you should have a Windows 2000 installer with the Thumb Boot option

on the boot menu. Q: Is it good to put the Javascript variable in the javascript file I have a website that uses a javascript file to tell the user to wait while it loads other javascript and images. I've seen other sites that uses a variable to tell the user to wait for the page to load. I

wonder what's the difference. Which one is better? If I have to use a variable to ask the user to wait, I'm going to create a function to load the page and put it
