I have a problem that is driving me nuts. I am unable to download The Amazing Spider-Man 3 (2018) to my Iphone5 so that I can watch it on my portable device. I have tried it with both iTunes and Ipod touch 4, and I have tried downloading it to my pc and uploading it to my phone. I also tried downloading it to my PS3 and installing it via XBMC and my HTC. All of these procedures are producing a file size of 72mb. I get an error saying that my file is too big to download, even though my internet speed is 768 Kbps. I have tried letting it download to the phone and then canceling the download.
