Jan 17, 2018 I'm having problems with the wowversion. Mrfishit crashed when I tried to log in to a character I have created. I have tried logging in with the same user on a different account with the same password and it still crashes. I was wondering if there

is an issue with the version I have. I am using the version 1.5.8 I'm having trouble getting this working. I want to get the fishing bots working but I cant seem to find any instructions on how to use it. Any help would be greatly appreciated. I'm a fairly new World of Warcraft player but I have some programming knowledge which is why I thought I could try and make a bot of my own. A bot is a program that automatically does something for you, like playing for you. In this case I wanted to do that. A fishing bot is a program which automatically fish for you. Currently I am trying to use the one which is posted on the wowwiki: The bot is programmed in java and you basically input your player name and your account name and the bot will do it. So if you are playing a hunter and you want to play with the fishing bot in your name, all you do is enter your hunter name and your account name and it will fish for you. However I was not able to get it to work and also I don't 2d92ce491b
