Press any key to reboot" References See also Backup software Disk cloning Digital forensics Live CD SystemRescueCD Category:Windows-only software Category:Discontinued Microsoft softwareThe present invention relates to means for administering a liquid sample, such as blood or bodily fluid, to a body part, such as a finger, earlobe, lip, or heel. More particularly, it relates to a device which is capable of administering a liquid sample to a body part with ease, accuracy and a minimal amount of pain and discomfort to the user. Conventional prior art medical tubing devices for administering a liquid sample to a body part are commonly attached to the patient by means of adhesive tape or a tie. The object of the adhesive tape is to secure the tubing device to the patient 2d92ce491b
