[ on Researchgate ]Description A highly functional tool for use in various mobile development tasks. Using Gramework you can create, modify and test your own grammars to describe the way your application should communicate with the user. Gramework offers a flexible framework that allows you to: - Define your own user interfaces in a simple, yet powerful way; - Define your own data models, data types, and validations in a simple and intuitive way; - Generate your own client-side validation algorithms; - Build your own client-side validators in C# or Java; - Use your own data access classes and repositories; - Translate your data model into your desired format, that is converted by Gramework to any kind of data format used by your client-side code. This means that you can choose the most appropriate method for each data type, feature, and user task. This results in a very flexible solution that allows you to manage all details of the application from the grammar. On the server side Gramework provides a programming model based on what we call the Universal Language. This means that your data and validations are defined using your own DSL (Domain-Specific Language) which in turn is automatically translated to a more abstract language (Universal Language). This means that you can build any kind of project using the same client-side tool. Of course, you can use Gramework as an independent library too. Gramework was developed by a team of highly experienced engineers from our partner company Intelligent Information Technology s.r.o. Version 3.0 of Gramework includes a support for .Net 4.0. Check out the features in the documentation. Download Latest release Gramework 3.1 Gramework 3.0 Downloads Vagrant The project is hosted on Github. You can download the code and start it in a vagrant virtual machine. SVN Download the code from the SVN repository. You need to install TortoiseSVN for that. It is a subversion repository. It means that you can download a binary file, that includes all necessary code. Latest release Gramework 3.1 Downloads Development Please contact us for any kind of support. We are in the process 2d92ce491b
