Many of these products can be used to customise the

command bars of the program, such as the Standard toolbar. This is achieved through a number of files called dictionaries, most notably the DOCU file which manages dialog boxes. These files can be created manually and a directory structure can be manually created to hold the dictionaries. The drawings and dictionaries can be saved in native or Inventor-based file format, such as DXF, MDD, DWG, DWF,

Raster Image, or Vector Image. When the 2.x line of Autodesk products was released, it had support for Xrefs (cross-references) between AutoCAD Activation Code drawings. The first releases of AutoCAD for the Windows operating systems were on MS-DOS, followed by Windows 3.x and Windows NT. Autodesk releases for the Mac OS were delayed as a result of legal issues concerning its previous

owner, Macromedia.
Autodesk acquired the rights to Macromedia's source code and they had to be separately licensed. From Autodesk's point of view, they saw Macromedia's success and this put them in a position of needing to re-license their product. The legal problems have been overcome by Autodesk acquiring Macromedia and then shutting down its consumer division, acquiring its source code

and then releasing the first versions of AutoCAD for Mac OS, and Autocad Expert for Mac OS.

Firmware updates

Autodesk's primary means of firmware updates for

Autodesk software is to distribute them via

automatic downloads

through Autodesk's Desktop

Applications Manager, and

later, via Autodesk

Exchange Apps. Autodesk

also provides updates

through its Learning Paths,

which offer manuals and training resources. Autodesk released the Windows Update for AutoCAD Community Edition and AutoCAD LT Community Edition beta on October 24, 2013, then the public version of Autodesk Update for AutoCAD Community Edition on January 31, 2014 and the final version of Autodesk Update for AutoCAD LT Community Edition on July 7, 2014. On October 11, 2014, Autodesk

Inc. released Update 4 for AutoCAD 2018. On April 14, 2018, Autodesk released Update 5 for AutoCAD 2018. Starting with release AutoCAD LT 2.6.4, each of Autodesk's main products has a separate updater
