I have a service that is used to discover and connect to other devices through Bluetooth. I am able to discover and connect to them, however I need to access the filesystem on the device so I can download a file (it's a video file). I've tried using an ACTION\_SEND intent for this purpose, however the onActivityResult() function is never called. This is the code I'm using to send the file: @Override public int onStartCommand(Intent intent, int flags, int startId) { String action = intent.getAction(); if (action == null) { Log.e("BluetoothService", "Sending intent with null action"); 4bc0debe42
