Jun 3, 2020 Tenorshare iPad Pro Data Recovery 2015.2 is a powerful and easy to use app designed for you to extract data from jailbroken.oh, yeah. You could try all sorts of parallel implementation: 1. the very straightforward matrix-vector multiplication is FFT 2. a single thread FFT (one that splits in half and doubles the amount of work, but only in the angle domain) 3. multi-threaded FFT in the angle domain (or doing as many FFT's as you have usable threads) 4. the multi-threaded one in the frequency domain. 2. a single thread FFT is easy to implement, and is reasonably fast. It may seem wasteful not to use FFT and do the conversion afterwards, but the advantage is that the FFT can do multi-threading to scale to as many threads as you have... 3. This is the way I'd try, personally. BTW: as for the FFT, be sure to use the optimized versions on Intel processors, if your processor supports them. They're
