Makes it simple to prep, edit and present content more effectively. Visualize, track, and manipulate your elements in real-time, no matter what they're from. Developed by Apple engineers, Apple Motion combines seamless integration with the Mac's natural camera motion capabilities as well as the latest tools from Adobe, to help you create smooth transitions and perform just about any other visual motion. From Apple and Adobe comes Motion 5, an award-winning 3D visual effects suite that makes it easy to visualize, track, and manipulate 3D assets without the need for a 3D app, plug-in, or external software. Design and animate characters, props, objects, and text and place them in any 3D scene with extraordinary ease. Apple Motion helps you achieve a feeling for your story and characters that's real and believable.
