You don't need any skills or skills to use them, but you can start using them right away. Simply go to the search box, type in your search query, and the template search will list all the VBA project templates that match your search terms. If you are a customer looking to get your hands on VBA project templates, it is as easy as that. You just need to fill in the search box, and then click the Search button to get started. Screenshots are provided for your convenience. Do let us know if you have a feedback about any of our templates. A Browser Extension to Hide or Remove Files from Organize Imagine a utility where you can hide the files that you don't want others to see. Well, that's what Organize is for. Designed for webmasters and website managers, it allows you to exclude some files from any directory of your website, make it invisible for others using your machine, and block it completely from being accessed by anyone else. In other words, you can install the extension to easily remove certain files from a website that you don't want to be seen by anyone else. This feature is similar to your ordinary cloud storage services like Google Drive and Dropbox. You can create 'exclude folders' using Organize, and place them anywhere in your machine
